

MetaTrader 5 Quotes Freeze Plugin

Introduction

The Quotes Freeze plugin is intended to disable trading on a particular symbol if the market price had not been updated for a period of time. This plugin is a good insurance against the technical failure of the server datafeed and prevent traders from taking advantages on stopped/stale prices.

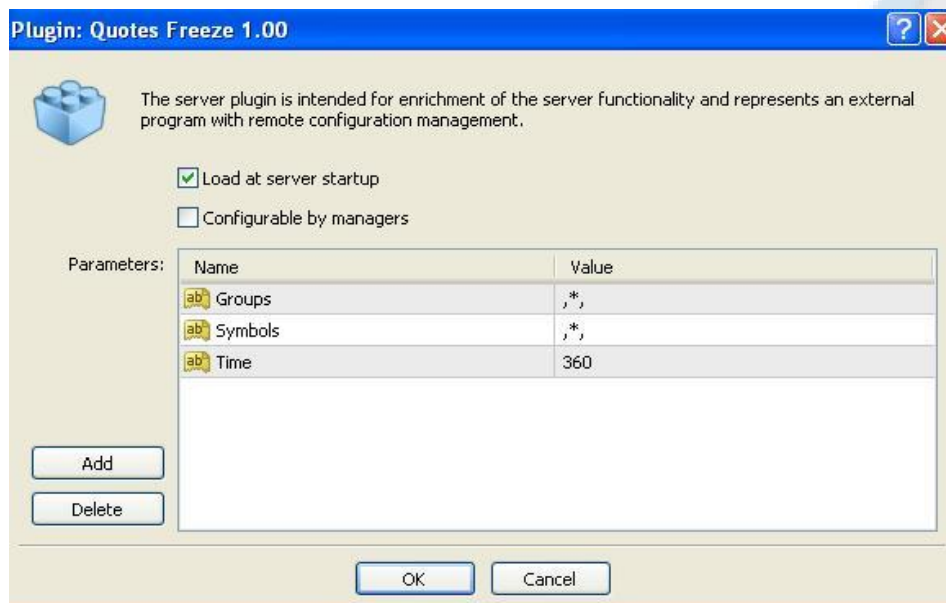

Plugin Installation

To install the plugin, the MetaTrader 5 Main Server program has to be stopped temporary before copying the QuotesFreeze.dll file into the "MetaTrader 5 Platform/MainTrade/plugins" in the server root directory.

1. To stop the server, click on Start/Administrative Tools/Services.
2. Under the Services window, look for MetaTrader 5 Main Trade Server and click it.
3. On the General tab, under Service status, click on the "Stop" button and wait for the MetaTrader server to stop.
4. Transfer/Copy the quotesfreeze.dll file into the server root directory "plugin" folder.
5. Go back to Services window, click "Start" button to start the MetaTrader 5 Main Trade Server.

Plugin Configuration

After installation of plugin, it is necessary to configure its settings.

| Parameter | Description |
|-----------|---|
| Groups | Groups processed by the Quotes Freeze plugin. The groups can be listed using templates. For example, demo* - all demo groups, !real,* - all groups except for the real ones, demoforex-usd, demoforex-jpy - only groups named demoforex-usd and demoforex-jpy, respectively. |
| Symbols | List of symbols to be processed by the Quotes Freeze plugin. The symbols can be listed using templates. For example, USD* - all symbols starting with USD; !SILVER,!GOLD,* - all symbols except for gold and silver. |
| Time | The amount of time limit in seconds which the plugin will monitor on the pre-set symbols. If a particular symbol exceed the pre-set time limit, "Off Quote" warning message is displayed. |

After configuration of the plugin, the MetaTrader 5 program has to be restarted for the new configuration to take effect. To restart, look to the top left of the MetaTrader 5 Administrator program once you have found it, please highlight the Main Server under "Network" in the left-hand side Tab then click on Restart Server, or right click the server and restart it..
